SURFACE PREP

Abrasive Blasting

We can offer a variety of blast media to fit your needs. Our largest blast room is 40' x 16' x 12'. Blasting is available at both the Mankato and Litchfield facilities.

Large Capacity Pretreatment

We can efficiently pretreat high volume orders for coating with our three in-line washers: 6-stage, 5-stage, and 3-stage composite washers. Window size is 5' x 3' x 10'.

Oversized Pretreatment

We can effectively pretreat large parts in our Litchfield wash bay. The wash bay is 25' L x 10' W x 9' H and the wands are set up with zirconium or iron phosphate pretreatment. Other pretreatments can be added upon request.

Stripping

We can help you quickly and economically reclaim parts, paint hooks, and other items using two processes—chemical stripping and burn-off. We can remove almost any organic finish, including hard-to-break coatings like epoxy, nylon, and e-coating.

**Assembly and
special packaging
services
are also available!**

COATING

Coating Systems

4 Conveyor Paint Lines

5 Powder Batch Booths

Largest Booth 40' x 16' x 12'

3 Liquid Batch Booths

Largest Booth 40' x 16' x 12'

Powder Coating

We can give you the most durable heat-fused powders for metal substrates. Powders are available in many colors and types such as polyesters, urethanes, epoxies, etc. Parts can be selectively masked for special applications.

Liquid Coating

We can give you the diversity of liquid with a wide range of base compositions, finish properties and textures. Substrates may include metals, plastics and composites. Coatings range from water base, standard bake enamels, epoxies, and polyurethanes. Teflon and other specialized coatings are available.

CARC Coating & MIL-Spec Coating

Chemical Agent Resistance Coatings. AFI is one of the few coating companies that offers CARC coatings in Minnesota. CARC is a specification driven coating process. AFI can do the entire pretreatment, and coating application all under one roof. Please call our quoting department to inquire about CARC coating.

SILK SCREENING

Silk Screening

We can add graphics or accent color to metal, plastic, or glass. Associated Finishing specializes in precisely tooled fixtures for close tolerance applications. We can provide finished screened parts or just the screens for companies with in-house printing capabilities.

Pad Printing

We can print finely detailed graphics on small or irregularly shaped parts. This process is suitable for both smooth and textured surfaces. Tooling is prepared in-house to ensure quality and rapid turnaround.

Artwork Requirements

AFI has in-house silk-screen and plate exposure units. Artwork can be e-mailed to an AFI contact for more information.

Please e-mail artwork to:
quotes@associatedfinishing.com and we will take care of the rest!

**Whether you have 1 part
or
10,000 parts we can
finish them all!!**
